Machine Learning - Coursera

Profile

Self-taught developer and business graduate with experience in both the programming and the management field. I have a passion for new technologies and building things in the digital world. I have work-experience in different fields, including **finance** and **retail**, and I am able to easily fit into new cultures.

Experience

Frontend/Mobile Developer

Rocker (Bynk AB) | September 2019 - Now | Stockholm, Sweden

Worked on bringing life to Rocker (app/web) and making it one of the most downloaded apps in Sweden:

Mobile: I redesigned the whole app multiples times using React Native, worked and deployed new features for thousands of users, such as invoice payment, card features, budgeting and special offers. I helped building a new design language and creating shared components.

Frontend: I redesigned our main website from Bynk to Rocker using Gatsby, React, GraphQL and CSS, and added new features such as interest rate negotiations. I worked on the flow for a checkout solution using Typescript and Sass.

Backend: I created a service in NodeJS using Kafka and PUG templates to design and print invoices to Rocker Pay Customers.

Software Developer Intern (Omnichannel)

Factorymarket | January 2019 - June 2019 | Berlin, Germany

Created analytic tools for the marketing team and our workers in the stores. Improved the customer journey inside our shops by creating a system of QR codes leading to a web page with details on our products.

Fullstack Web Development: React.js, NodeJS, ExpressJS, JQuery

Mobile Development: React Native

Data Science: MySQL, PostgreSQL, Redash, Google Script, Google Data Studio

Other: Project Documentation, CI/CD Pipeline, Kubernetes, App Engine.

Founder and Developer

Localears | June 2018 - November 2018 | Lyon, France

I worked on the project Streaming Platform to help Musician get visibility in their region. I designed and developed an app in React Native and a website with React and presented it to investors

Android Developer

Kargo | June 2017 - September 2017 | Lyon, France

I developed a Mobile App for package delivery in Java for Android.

Assistant Finance Manager

Oxfam | January 2017 - April 2017 | Newcastle Upon Tyne, United Kindom
